Exclusive:

CTAV™

cooling Technology
for
Aprons & Vests

Keep your cool with the CTAV™ Cooling Panel!

Lightweight • Practical • Effective

Patent Pending passive
cooling system uses:

- no circulating water
- no dangling tubes
- no ice packs
- no hazardous chemicals

Featuring EVERDRY™

Antimicrobial, antifungal nanocrystal
surface keeps you dry and comfortable.

Without CTAV™:

- Heat and moisture are trapped between the skin and apparel.
- Sweat cannot evaporate.
- Increased fatigue.
- Heat stress and loss of alertness, concentration, and focus.

With CTAV™:

- Air flows across the torso and CTAV™ panel.
- Body heat escapes through passive convection.
- Metabolic heat is conducted into inflated chambers and naturally vents from behind apparel.

Up to 16.2% or 9° reduction in body heat!

The story:

CTAV™ technology was originally designed to keep police and military personnel cool under pressure while wearing a shielded vest or flack jacket.

Now, Techno-Aide is proud to bring this technology to you, to keep you cool when wearing radiation protection garments for extended or multiple exams.

Features and benefits of CTAV™:

- Heat is no longer trapped between you and your apron or vest.
- Passive cooling convective airflow allows your body heat to escape.
- Increased natural ventilation of metabolic body heat.
- Does not affect range of motion.
- Ribbed, air-filled panel dissipates heat and heat storage from the body and the apron or vest.
- Quick harness is repositionable to make the perfect fit for you.
- Quick-action hand air pump is included.

Things to Remember

CARE AND MAINTENANCE:

- Always hang your garment on large diameter hangers. Do not wad or fold your garment, as that may weaken the level of protection on the folded seam.
- Do not store sharp objects in the pockets or store the garment on top of a sharp object.

WARRANTY:

- Two-Year Warranty on materials and workmanship.

Recycle

- Techno-Aide will gladly accept your old, leaded **Techno-Aide Brand** aprons for recycling.
- Call for a "Recycle Return Authorization." There will be no charge to you; we only ask that you pay for your own shipping.
- "Lead-Free" apparel is environmentally friendly and does not need to be recycled.

NON-COATED STANDARD GRAY SPONGE

Soft, open cell, polyurethane foam provides excellent support and comfort. This foam has minimal attenuation, is fire retardant, and has been the industry standard for decades.

COATED STANDARD SPONGE

This is the same standard gray sponge outlined above, but is coated with a medical-grade, durable and easy-to-clean vinyl surface that is resistant to blood, Betadine®, barium, alcohol, oils and other fluids. Attenuation is very low (*edges may show, depending on techniques using low kVp*). Ideal for sterile environments.

NON-COATED HIGH-DENSITY SPONGE (See Bariatric Section)

These large-sized blocks are specifically designed to provide extra firm support for bariatric and athletic patient positioning. Coated versions are also available.

REFERENCE: Merrill's Atlas of Radiographic Positioning and Procedures, 9780323073219, text extract, "Each radiograph must include an appropriate marker that clearly identifies the patient's right (R) or Left (L) side. Medico-legal requirements mandate that these markers be present. R and L markers must be used with CR and DR digital imaging. The development of digital imaging and the use of CR and DR have enabled an environment in which the R and L markers can be placed on the image electronically. This is not recommended because of the great potential for error and legal implications. Anatomic markers should be placed on the CR cassette or DR table similar to screen-film cassettes."

Digital Imaging Markers

Make accurate comparisons between life-size (what you see) and image-size (what you get)!

#1DR \$46.00 ea. set
Digital Style R & L - 3/4"
2 or 3 initials - 1/4"

- Each marker has a lead 3cm ruler.
- Color coded: L-Blue, R-Red.
- High density lead characters.

Specially Designed for Digital Imaging

#2DR \$46.00 ea. set
Digital Style R & L - 1/2"
2 or 3 initials - 1/4"

The personalized R & L marker sets or the stand alone 3cm ruler are specifically designed for Teleradiology, CR and DR Imaging, where the image-size does not always match the life-size anatomy.

Place a marker on the CR or DR Plate and capture the radiographed anatomy. The image of the unique 3cm ruler gives an immediate visual and measureable cue as to the size of the screen image compared to the life size anatomy.

Terms & Conditions

Terms

- Net 30 days for approved accounts.
- New accounts may be opened on a Prepaid basis pending credit approval.
- Freight Charges are prepaid and added to the invoice.
- Invoiced shipping, handling, and insurance charges are \$6.95 or greater, depending on actual freight costs.
- FOB Destination: Freight Prepaid and Added from Nashville, TN, USA, or other authorized location.
- In Tennessee, Sales Tax is billed unless a valid exemption certificate is on file with Techno-Aide at the time an order is placed (Required by Federal Law).
- International Customers: All terms and policies are governed by specific Pro Forma Invoice.
- For your convenience, we accept MasterCard, VISA, American Express and Discover for prepaid orders.

- **PRICING:** We reserve the right to change prices or discontinue products without notice, but only as a last resort.

- **SPECIAL NOTE:** Motor freight companies will not unload shipments to accounts who do not have a suitable commercial height receiving dock, nor will they unload large or heavy items to ground level. Many times, however, advanced arrangements for curb-side unloading can be made by facility personnel or the shipment can be made to your location for dealer delivery. For an additional charge and notification at the time of order, "Inside Delivery" or Cartage can be requested. The specifics of this service, however, are governed by your local freight terminal.

Return Policy

- Products cannot be returned to Techno-Aide, for credit or otherwise, unless accompanied by a Return Authorization Number issued by the Customer Service Department.
- All authorized returns are subject to a minimum 20% refurbishing and reconsignment fee.
- All protective apparel returns are subject to a minimum 50% breakdown and restocking fee.
- All returns must be shipped in the original packaging.
- No returns 45 days past the invoice date will be allowed.
- Techno-Aide will authorize returns for complete credit in the case of Techno-Aide error or defective merchandise.
- A Credit Memo will be issued only after the returned merchandise has been received and inspected by Techno-Aide.
- No returns will be allowed for personalized, custom items or Designer Colors unless they are defective.
- Damages on returned items are the responsibility of the shipper. For proper credit to be considered, every effort should be made to assure a damage-free return.

Damaged Goods Policy

- The carrier has signed for receipt of merchandise from our factory and has accepted them in good condition.
- If your shipment arrives damaged or incomplete, it is the consignee's (ship-to) responsibility to note visible damage or shortages on the Bill of Lading BEFORE the carrier leaves. **FAILURE TO NOTE ANY DISCREPANCIES ON THE BILL OF LADING WILL VOID ANY ATTEMPTED FREIGHT CLAIM and/or DELAY OR FORFEIT ANY CUSTOMER CREDIT.**
- Techno-Aide will be glad to assist you by having an inspector from the carrier come to inspect the shipment and by working with you for any necessary replacements. Replacements are treated as separate orders, requiring their own purchase order number for billing. Any possible credits will be issued on the original order.
- Whether the damage is visible or concealed, **KEEP ALL PACKAGING MATERIALS FOR THE CARRIER INSPECTOR.**
- Reporting and inspection must be made within seven (7) days after delivery. Delayed reporting can delay or void the carrier's responsibility to pay your claim and negate any credit for freight damage from Techno-Aide.
